## GAUGES AND ELECTRONICS

**Gauges** Stay informed while you keep your eyes on the road. Auxiliary gauges keep you in touch with the pulse of the engine, and can be positioned for maximum visibility and minimum distraction.

Keep in touch while getting away from it all. Gauges and electronics are the link between your brain and the bike. Auxiliary console and handlebar mounted instruments help you monitor the engine's vital signs, and a GPS Navigation system helps you keep track of the world around you.

**Electronics** The open road is timeless — and new technology takes away old headaches. With a GPS system (above) installed on your motorcycle, you can wander as far as you want and still never be lost. If you want to set the mood with music, an XM® Satellite Radio receiver (left) can give you more freedom than the local radio.

## LIGHTING AND VISIBILITY

Motorcycle lighting serves two main purposes: to help you see and to help others see you. It also contributes to the overall style and profile of the bike. Choose from a variety of auxiliary lamps, headlamp trim, turn signals and Electra-Glo™ decorative lighting to help make your statement.

**Get Noticed** There's more than one way to get attention. The Premium Air Horn (left) is one of the loudest motorcycle horns available. And auxiliary brake light and turn signal conversion kits (above) give your rear lighting three functions. The red lenses glow brightly when the brakes are applied and also serve as running lights and turn signals.

## Step Into the Light

Believe it or not, chrome isn't the brightest accessory you can use to customize your ride. Harley-Davidson offers a variety of lighting options that can add the perfect finishing touch to nearly any part of your bike.

### Electra-Glo™ Light Pods

Light up the night. These compact LED Light Pods radiate a neon-like glow to accent almost any part of the motorcycle. Featuring a solid-state circuit board sealed against the weather, these self-adhesive lights can be placed under the tank, behind the air cleaner, or almost anywhere your imagination takes you. Electra-Glo LED lighting draws minimal amperage, allowing lights to be left on for hours when parked. Light Pods connect directly to the motorcycle wiring harness, and the one-way wiring simplifies installation.

### Electra-Glo™ Light Pod Kit\*

The complete kit includes 6 light pods, basic wiring in a selection of lengths, adhesive wire ties, and a compact on/off switch with rheostat to control the lighting intensity. Available Expansion Kits provide plug-in installation of additional lighting.

Fits all models. Lights are intended for display use only. Some local regulations prohibit using colored lights during vehicle operation on public streets.

\*NOTE: It is possible to overload your motorcycle's charging system by adding too many electrical accessories. If your combined electrical accessories operating at any one time consume more electrical current than your vehicle's charging system can produce, the electrical consumption can discharge the battery and cause vehicle electrical system damage. Ask your dealer for advice about the amount of current consumed by additional electrical accessories.

### Let There Be Light

Featuring the latest in reflector optic design, Harley-Davidson® Original Equipment headlamps and accessory Dual Bulb Halogen Headlamps offer low-beam performance that is superior to traditional sealed beam bulbs. The wide curb-to-curb low beam pattern provides a great around-town view. Cruising down the back roads, Dual Bulb High Intensity Discharge (HID) or Dual Bulb Halogen headlamps add extra punch down the center of the lane, all while maintaining their excellent low-beam performance.

#### A. High Intensity Discharge (HID) Dual Bulb Headlamp Kit\*

Cut through the darkness. The Harley-Davidson High Intensity Discharge Headlamp Kit features a true HID (Xenon) low beam bulb that projects a curb-to-curb spread of "blue/white" light. Compared to the yellow light of a traditional Halogen bulb, the HID lamp produces a "Daylight Color Impression" that appears more natural to the user.

The HID Dual Bulb Headlamp assembly features unique advanced optics with separate low and high beam reflectors dedicated to focus the light for optimal illumination. The HID low beam is always illuminated, providing a wide pool of light, and the separate Halogen high beam bulb adds a focused shaft of light down the center of the lane.

The HID Dual Bulb Headlamp is not just a high-performance bulb, it's a complete lighting system. The system includes the HID bulb, an electronic starter, and a ballast system. The bulb is a complex tube that replaces the filament with arc-producing electrodes. The starter allows quick ignition of the arc, and the ballast converts incoming power to the high voltage needed to maintain the glow. The Xenon-filled HID bulb is resistant to vibration, and has a life expectancy of up to 10 times that of a Halogen bulb. The headlamp kit is DOT approved for use in all 50 states.

The complete Headlamp Kit includes the shock and vibration resistant housing HID low beam bulb, halogen high beam bulb, starter, waterproof ballast, and all necessary wiring.

#### B. Dual Bulb Halogen Headlamp Kit

The Dual Bulb Halogen Headlamp features advanced reflector optics and separate bulbs for high and low beam functions. The euro-inspired projector beam styling combines a state-of-the-art look with a CAD designed faceted reflector bowl that is optimized for crisp patterns and light cut-off. The single upper bulb functions in low beam, and both upper and lower bulbs operate in high beam. The low beam setting produces a wide curb-to-curb light pattern, and the high beam adds focused light down the center of the lane without compromising width. Kit includes housing, 55-watt low beam halogen lamp, 35-watt high beam halogen lamp and all necessary mounting hardware. Does not meet ECE regulations.

## WHEELS, SPROCKETS AND ROTORS

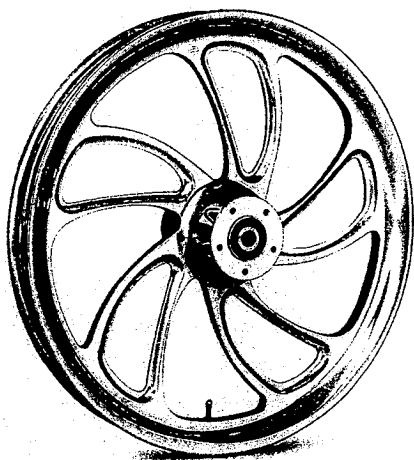

Your bike's overall personality rests heavily on the wheels you choose. Traditional laced wheels add a nostalgic open and airy look, while multi-spoke forged and cast wheels lend a strong, contemporary style. Whatever direction you pick, adding matching rotors and sprockets finish the custom appearance.

***Find the Right Combination*** To pull the bike together visually, select complementing wheels, brake rotors and drive sprocket. To finish the custom look, add chrome wheel spacers, axle covers, and custom rotor and sprocket hardware.

# A Visual Turning Point

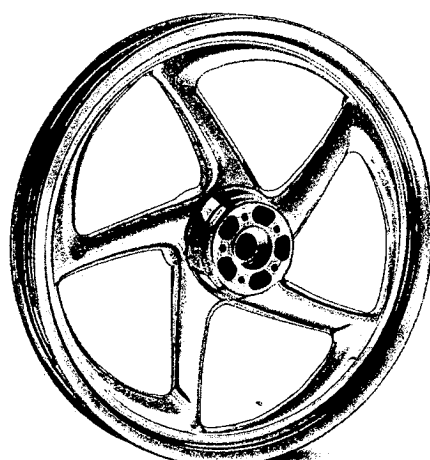

From a visual perspective, the wheels, sprocket and brake rotors make up almost half of the motorcycle's profile, and set the styling direction for the whole bike. Choose wisely. Harley-Davidson® Forged, Cast and Laced wheels undergo hundreds of hours of real-world testing, to meet the highest standards of performance and durability. All Harley-Davidson wheels bear DOT and JWL markings, ensuring that they meet the requirements of those agencies.

**Blade Forged Wheel**

*A cut above the rest.*

Curved ten-spoke detail is pulled into a traditional five spoke design, balancing complexity with simplicity.

**Reaper Cast Wheel**

*Drop dead gorgeous.*

Knife-edge scythe design imparts the feel of forward motion, even while parked on Main Street.

## Forged Wheels

**Performance Under Pressure** One-piece forged wheels are manufactured by squeezing a solid billet of aerospace grade 6061-T6 aluminum under extreme pressure. The resulting material is very strong, so the final wheel design can have a lighter, more open style. The forging process aligns the metal grain for maximum strength, and the non-porous surface takes chrome like no other. Harley-Davidson custom forged wheels are manufactured in the USA by Alcoa®, the inventor and leading supplier of forged wheels to the transportation industry.

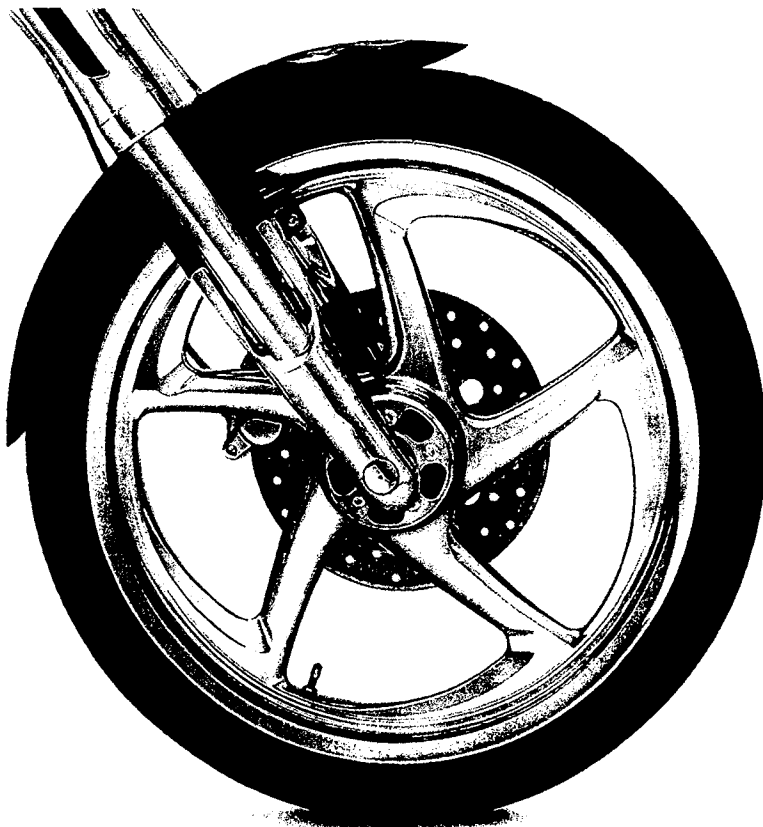

## Cast Wheels

**Liquefied Metal** One-piece cast wheels are manufactured by pouring molten aircraft-grade aluminum into a wheel-shaped mold. This casting method allows the wheel design to feature hollow spokes and hubs for lighter weight, and permits incorporating styled surface textures that add visual interest. The casting process produces a wheel surface that is ideal for machining and polishing, and accepts both chrome and painted finishes for a distinctive look. Available in a wide variety of styles, cast wheels are an affordable customizing option.

**A. Slotted Six-Spoke Wheel**

A dramatic look that breaks the mold in motorcycle wheel styling. Available in black or chrome, this stylish custom wheel incorporates the strength of twelve spokes into the illusion of a lightweight six spoke design. Textured finger-like slots radiate from the center to the uniquely rounded smooth finishes on the inner and outer rim. The combination of polished and textured finishes on the spokes, rim and hub fool the eye and add to the sleek appearance, while the premium quality cast aluminum construction reduces weight without compromising strength. Equally spaced and raised nubs around the rim breathe custom, and the embossed Bar & Shield logo ensures that these wheels are a Harley-Davidson exclusive. Matching brake rotors and sprockets are available for a complete custom look. Certain wheel kits require separate purchase of model-specific Wheel Installation Kit.

Add a splash of chrome. Also available for Softail models, these fully polished nine-spoke wheels are styled to match the Original Equipment wheels on many Touring models. More than just a chrome-plated Original Equipment Touring Wheel, these wheels utilize tooling developed specifically for chrome-plating to give a near perfect finish without the "waves" created when polishing the Original Equipment cast wheel. The rib on the Original Equipment wheel spoke has been removed to provide a smooth uninterrupted spoke finish. Special masking was developed to prevent plating corrosion inside bolt holes and bearing sleeve areas. Certain wheel kits require separate purchase of model-specific Wheel Installation Kit.

# COLOR SHOP

**Exotic Custom Collection** The ultimate expression. While not for everyone, limited edition Exotic Custom paint sets feature the style and design usually reserved for one-off custom work. Starting with fresh factory sheet metal, our artists add layer upon layer of color, interwoven to add unforgettable depth and texture. Each exclusive hand-numbered set includes a matching framed and numbered wall hanging.

**Radical Custom Collection** The key word here is 'radical'. Mirror-polished Radical Custom Paint Sets feature exclusive, limited-quantity designs, hand-painted to offer superior depth and detail. Styled to complement a family of motorcycle models, the colors and curves work to showcase the lines of the bike. Each show-quality paint set is numbered to give you a special exclusivity.

# SON

Maybe you've got a radical streak, or just demand a splash of color. It's easy to express yourself with Color Shop custom paint and Color-Matched accessories. Select a design that mirrors your attitude, and the depth and quality of finish will reflect the bike's inner soul.

**Select and Edge Flame Paint Sets** Make your individual statement. Select Paint Sets feature theme designs styled to get you noticed. Edge Flames Sets feature subtle tone-on-tone flames that flow from fender tip to fender tip, changing in intensity as the day rolls on. Available year-round by special order, both programs feature factory-fresh sheet metal, and are covered by a two-year factory warranty.

**Personal Accents** Change the look without changing "The Look". Personal Accents Fuel Tanks allow you to add the allure of custom paint without actually painting all the metal. Designed to complement the Original Equipment finish on your bike, Personal Accents tanks and bodywork feature unique graphic elements that add an aggressive edge to the monochromatic style of your bike.

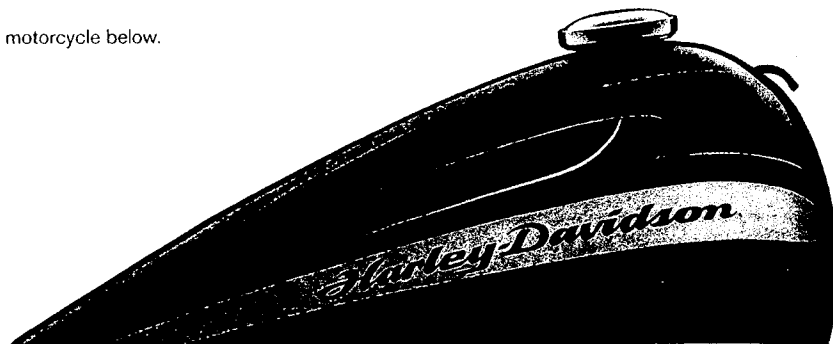

## Your True Colors

If chrome is for a motorcycle's body, then paint is for its soul. The most visible piece of any customization strategy, the paint's style, depth, and richness establishes the tone for the rest of the accessories, and the finish sets your bike apart from the crowd. And with the continuous and rigorous testing we put all our paint suppliers through each year, you know quality is inherent. Plus, the unmatched, 2-year Harley-Davidson® warranty for all paint sets sold and installed ensures your satisfaction with every job.

Explore the different paint sets available for your Harley-Davidson® motorcycle below.

Dress your custom ride in classic flames, with an "edgy" twist. The solid base color surrounds your bike for a stealthy look, and the complementing shadow flame outline adds depth and dimension. The Bar & Shield logo adds a proud testament to the spirit and legacy of Harley-Davidson® motorcycles. Each Edge Flame kit includes a complete set of painted original equipment sheet metal and body panels.

### **Spectrum Custom Color Program**

**Tap into a quarter-century of legendary Harley-Davidson® design and styling expertise.**

The Spectrum Custom Color Program allows you to draw from virtually every standard color and logo combination offered by the factory since 1979. Select from classic two-tone panel designs, color schemes, and decal or medallion logos to make your dream come alive. You have the freedom to select from an almost unlimited combination of colors to color-match current or historic Harley-Davidson® models, or you can select from an endless number of automotive-style color choices.

You can supply your own Original Equipment undamaged sheet metal, or buy a replacement primed set; either way, you can create your own look and still get the high quality you expect from a factory-painted Harley® motorcycle.

Available exclusively through your participating Harley-Davidson® Dealer, the dealer can help you create your design, choose your colors, and select a decal or silk-screen graphic to finish the look.

**The Harley-Davidson® Spectrum Custom Paint Program\***

The Spectrum Custom Paint Program allows you to have your Harley® motorcycle painted to match any color scheme you can imagine. Start with your own sheet metal, or buy a replacement set. You can have individual fenders and tanks painted, or order complete sets, using the part numbers shown below. If the customer's existing sheet metal is being used, it is the customer's responsibility to submit original condition, undamaged parts in a timely manner. See your dealer for details.

You can choose your main color, panel color, top coat, and pinstripes. You can specify a "clear," "pearl" or "candy" finish top coat. The top coat is a special paint that will work with the main and panel colors to create different effects.

Shown on these two pages are just a few of the unlimited color options available. Mix & match colors from vintage bikes, classic cars, or any other monochrome or two-tone paint scheme you can think of.

**A. H-D® Smart Security System**

The H-D Smart Security System offers automatic self-arming and hands-free disarming for vehicle electronic security functions for your '07-later Harley motorcycle. The Hands Free Fob communicates directly on its own unique and individualized frequency with the Hands Free Security Module and Antenna. Attach the Hands Free Fob to your vehicle ignition key ring. As you upright your vehicle or switch the ignition on, the Hands Free Fob will communicate the Security System "disarm" command allowing you to start your vehicle. After riding your vehicle, park and switch the ignition off with your key. Within 5 seconds the Security System will automatically self-arm, disabling your vehicle starter, ignition and electronic fuel injection (EFI). The rider may also disarm the system by keying a previously entered personal code on the turn signal switches. A flashing status indicator informs the rider that the Smart Security System is armed or disarmed. The Smart Security System allows configuration to include the Transport Mode or Extended Storage Mode. The Smart Security System includes: Hands Free Security Module (Integrated Security Sensor and Turn Signal Module), Hands Free Fob, Antenna Module, Antenna Harness and Antenna Mount (Dyna models).

### C. Harley-Davidson® Factory Security System

Equip your '06-earlier Harley-Davidson® VRSC™, Sportster®, Dyna®, Softail® or Touring model with the security system designed and approved by The Harley-Davidson Motor Company.

When armed, the Security System disables the starter and ignition while monitoring the electrical system and vehicle motion with adjustable sensitivity. Minor disturbances trigger a momentary warning; major ones an unbroken thirty-second alarm, after which the Security System returns to monitoring. A distinctive four-way flasher pattern is the alarm signal. An optional self-powered Smart Siren Kit adds a piercing scream that sounds even if the battery cable is cut.

The Security System is armed and disarmed with a remote control waterproof key fob utilizing state-of-the-art rolling code technology. If the key fob is not available, the rider may arm or disarm the system by keying a previously entered personal code on the turn signal switches. A flashing status indicator informs the rider that the Security System is armed or disarmed.

When armed in the Transport Mode, the Security System disables the starter and ignition, but monitors only the electrical system, not vehicle motion. The vehicle may be moved but electrical tampering triggers an alarm.

An Extended Storage Mode keeps the battery from discharging when the Security System is armed for extended periods of time.

The Security System is compatible with FL Touring models equipped with approved TLE/Ultra Sidecars when the system is configured as described in the **SIDECAR OWNER'S MANUAL**.

## Bodyguard in a Bottle

Introducing a breakthrough in powertrain protection – Screamin' Eagle® SYN3® Synthetic Motorcycle Lubricant. For use in engines, transmissions and primary chaincases, it's just the latest in a line of products formulated specifically to keep your Harley® motorcycle running strong, mile after mile.

### Screamin' Eagle® SYN3® Synthetic Motorcycle Lubricant, SAE 20W50

TESTED-CERTIFIED for use in Harley-Davidson® engine, primary chaincase and transmission applications, Screamin' Eagle® SYN3® Synthetic Lubricant makes changing and topping-off fluids a simple one-product process. Developed with a proprietary three synthetic basestock formula, Screamin' Eagle SYN3 Lubricant is formulated to provide for long-term protection and engine cleanliness requirements, and to provide superior high-temperature protection for high-output engines. SYN3 Lubricant is formulated to maintain the coefficient of friction for proper clutch operation and to provide the proper lubrication to the primary chain drive. In addition, SYN3 Lubricant is designed to provide the correct lubricity for the anti-wear requirements of transmission gears and for improved seal protection. This formula is approved by Harley-Davidson for use in all stages of engine life and is not detrimental to the break-in stage of engines.

**99824-03/00QT** Formulated for use in Harley-Davidson Engines, Transmissions and the following Primary Chaincase applications: '71-later XL, '83-'84 XR1000, and '84-later Big Twin models with wet-type diaphragm spring clutch. **\$9.95**

### What are the key benefits to using SYN3® Motorcycle Lubricant?

- SYN3 Lubricant can be used in the engine, primary chaincase, and transmission.
- SYN3 Lubricant offers improved film strength for superior wear protection at high temperatures, and improved deposit control for a cleaner engine, transmission, and primary chaincase.
- SYN3 Lubricant is formulated for reduced oil consumption, improved wear protection, high-temperature detergency, and superior overall field performance.

### What's the difference between synthetic and petroleum-based lubricants?

Both synthetic and petroleum-based lubricants are derived from the same crude oils. But that's pretty much where the similarities end. Unlike their petroleum-based counterparts, which inherit physical components (including contaminants) of the source crude oil in the refining process, synthetic lubricants are manufactured from basestocks that are custom-designed from scratch to have desired properties for specific purposes, meaning that engineers have complete control of the lubricant from start to finish – at the molecular level.

### What does SYN3® Synthetic Motorcycle Lubricant do for my drivetrain?

SYN3® Synthetic Motorcycle Lubricant offers all the benefits of Genuine Harley-Davidson® 360 Motorcycle Oil, and:

- Offers superior wear protection at higher temperatures
- Keeps engines, transmissions and primary chaincases cleaner
- Meets the anti-wear lubricity requirements of all transmission gears
- Lubricates all primary chaincase components
- Delivers smooth, sure clutch operation
- Provides long-term protection of all internal components
- Improves seal and gasket performance
- Offers superior performance in high-output engines

### What testing was performed on SYN3 synthetic motorcycle lubricant?

During its development, SYN3® Synthetic Motorcycle Lubricant was subjected to more than three years of laboratory bench testing, dynamometer testing under accelerated conditions, open road vehicle durability testing, closed course durability testing, and wear and deposit rating analysis.

### When can I start using SYN3 Synthetic Motorcycle Lubricant?

Right away. SYN3® Synthetic Motorcycle Lubricant is approved for all stages of engine life, including the first service interval – which means it's not detrimental to engine break-in. You can even use it as a first fill upon delivery of a new motorcycle.

### Since SYN3 Synthetic Motorcycle Lubricant is a high-performance lubricant, can I wait longer between changes?

No. As with petroleum-based engine lubricants, you should drain and replace the synthetic motorcycle lubricant in your engine at every 5,000-mile service interval. You should also change your oil filter anytime the engine lubricant is changed. If you ride your motorcycle hard, under dusty conditions, or in cold weather, you should change your SYN3® Synthetic Motorcycle Lubricant and oil filter more often. You should always change your engine lubricant and filter prior to any extended storage so that your engine is clean and free of any contaminants during this time.

### Tested-Certified SYN3® Extended Service Intervals:

#### Primary Chaincase

'84-later Big Twin models with wet-type diaphragm spring clutch. Every 10,000 miles, or prior to winter or extended storage periods.

#### Transmission

All Big Twin models. Every 20,000 miles, or prior to winter or extended storage periods.

#### Transmission

'70-earlier XL and K models. Every 10,000 miles, or prior to winter or extended storage periods.

#### Primary/Transmission

'71-later XL and '83-'84 XR1000 models. Every 10,000 miles, or prior to winter or extended storage periods.

## Protect your Harley-Davidson® motorcycle with H-D® 360 Oil

Harley-Davidson Motorcycle Oil is unlike off-the-shelf oils. H-D® 360 is a complex mixture of carefully selected premium quality mineral oil and an exclusive performance additive package. Designed for maximum performance in H-D® engines, H-D 360 is a unique oil for a unique application.

### Genuine Harley-Davidson® H-D® 360 Motorcycle Oil

Harley-Davidson Genuine H-D 360 Motorcycle Oil is developed and tested for use in Harley-Davidson® motorcycles. Our unique additive package helps prevent engine wear and helps keep your engine cooler, cleaner, free of sludge, varnish and corrosion.

Harley-Davidson V-Twin motorcycles operate at higher temperatures than water-cooled automobiles, thus a specific high temperature additive package is necessary to protect the engine. Be assured, H-D 360 Oil can be trusted in a Harley-Davidson engine.

Available in SAE 10W40, SAE 20W50, SAE 50, and SAE 60. Refer to your Harley-Davidson owner's manual for the proper SAE grade recommendation based on the climate and temperature range you ride in.

### Genuine Harley-Davidson® Motorcycle Oil Matrix

### What does H-D® 360 mean?

The name Harley-Davidson 360 has its roots in the testing criteria applied to certify this oil. More than just a dynamometer test, it is a designation of an entirely new performance rating system. To earn the name H-D 360, this oil had to outperform all others on a full round of tests. Laboratory bench testing measured viscosity retention and oxidation stability. Next, the oil was run on the open road under high ambient temperatures and high load conditions. After each test, the engineers performed a complete engine tear-down and analysis. Plenty of oils vied to carry the name Harley-Davidson, but only one oil met the challenge: H-D 360.

### What viscosity grade should I use in my Harley® Motorcycle?

The recommended viscosity grade for all temperature conditions is SAE 20W50 Harley-Davidson Motor Oil. SAE 10W40 H-D Motorcycle Oil is also available and appropriate for low temperature climates. The SAE 50 H-D Motorcycle Oil is satisfactory in ambient temperatures of 60-80°F, and the SAE 60 H-D Motorcycle Oil in ambient temperatures above 80°F. SAE 20W50 covers the broadest range of operating temperatures.

### What does Harley-Davidson® Motorcycle Oil do for my engine?

- Protects the engine from rust and corrosion
- Keeps the engine clean
- Cools engine parts
- "Seals in" combustion pressure
- Prevents foaming
- Permits easy starting at a wide range of temperatures
- Provides quick oil circulation
- Reduces friction and power loss

### How often should I change my motorcycle engine oil?

You should change your motorcycle engine oil and engine oil filter at the first 1,000-mile service interval and at every 5,000-mile service interval thereafter. If you ride your motorcycle hard, under dusty conditions, or in cold weather, the engine oil and filter should be changed more often. You should always change your engine oil and filter prior to winter storage (or any extended storage) so that your engine oil is clean and free of contaminants for this time period.

### Can I go longer between oil changes by changing the filter?

NO! The job of the oil filter is to remove dust, soot and other solid matter. Filters cannot remove water, gasoline or acids and it cannot do the job of oil additives that have been used up. You should change your oil filter at the first 1,000-mile service interval and at every 5,000-mile service interval thereafter or prior to winter or extended storage periods.

**Oil Filters**

The function of an oil filter is to remove dust, soot and other solid matter which contribute to engine wear. Filters cannot remove water, gasoline or acids and it cannot do the job of oil additives that have been used up. You should change your oil filter at the first 1,000-mile service interval and at every 5,000-mile service interval thereafter or prior to winter or extended storage periods.

**A. DEFINITIVE5™ Filtration System**

Stylized motor oil filtration system featuring integral pressure relief and anti-drain back valves and a replaceable filter element. The removable end cover allows for easy drain, preventing used fluid from draining onto the crankcase. Cover, housing and threaded adapter are CNC machined from aluminum and steel. The technologically advanced synthetic filter media provides nominal 5 micron (1 micron = .001mm) filtration which retains dust, soot and other solid matter with low internal pressure loss. The disposable filter element is more environmentally friendly as it does not contain the metal structure of a spin-on filter. Includes cover wrench.

**E. SuperSmart® Battery Tender®**

Many of the same features as the Global Battery Charger, but smaller and more economical. It's better than a trickle charger, because of the "smart" feature that turns itself on and off as needed, so your battery never overcharges. **A. Harley-Davidson® Double Platinum Spark Plugs**

Double Platinum spark surfaces offer superior erosion resistance even after millions of sparks. H-D® Double Platinum plugs also feature a patented semiconductor suppressor, a triple-coated shell with special anti-seize coating, copper core center electrode for high thermal capacity and peak performance at all engine speeds, tapered center and platinum side electrodes for maximum combustibility. Special high alumina insulator provides self adjusting temperature for maximum resistance to fouling. Harley-Davidson's longest lasting spark plugs.

**B. Harley-Davidson® Gold Spark Plugs**

A special thread and shell coating ensures quick and easy removal from aluminum heads and resists corrosion. A gold palladium insert extends life and improves resistance to corrosion. The tapered tip provides better spark exposure to air/fuel mixture and allows the mixture to flow more easily through gap area for maximum combustibility. Fouling resistance is improved with smaller diameter center electrode wire and insulator tip. Plus, a copper-cored ground electrode runs cooler for extended life.
